SOLUTIONS FOR
THE FUTURE ... FROM PIECES
OF THE PAST

SOLUTIONS FOR THE FUTURE...

Since its inception in 1995, Wishbone Site Furnishings has become an industry leader in sustainably designed street furniture. Based in Vancouver, Canada, Wishbone designs and locally manufactures innovative and functional site furnishings with high recycled content, requiring little or no maintenance. Our products can be seen throughout North America in parks, cities and campgrounds, with the stylish designs retaining their fresh look after many years of active service.

...FROM PIECES OF THE PAST

Wishbone embraces innovative design while minimizing environmental impact. We are intentional in every product design, emphasizing the recycled content and the sustainability of the materials used. Environmental stewardship is important to our customers and central to Wishbone as we create beautiful site furnishings that work better and last longer than alternatives.

We look forward to applying this approach to meet your needs.

WISHBONE INNOVATION

DISTINCTIVE LED LIGHTING

Wishbone developed one of the most exciting park furniture options in years by being the first to incorporate LED lighting beneath tables or benches. Create ambiance, facilitate safety or simply incorporate a unique look with efficient low-voltage LED lighting by Wishbone.

RAPID ASSEMBLY OUTHOUSE

Wishbone reinvents the outhouse building, making it ideal for back country locations. The design based on recycled plastic lumber in super-durable powder coated aluminum channels is easy to transport, assemble and maintain. Best of all, the materials are highly odour resistant, so everyone is happy!

Find out more about this outdoor marvel at WishboneLtd.com/outhouse

PERMA-PAD™ CONCRETE SLAB REPLACEMENT

Perma-Pad™ is our innovative, environmentally friendly alternative to a concrete pad. Easy to install in minutes, Perma-Pad™ offers an economical option for fastening all types of site furniture. Perma-Pad™ is made of recycled plastic and can be used anywhere, including in impact-sensitive green spaces and tree protected areas.

MULTI-FUNCTIONAL FURNISHINGS

The Annon modular bench allows for a wide range of configurations to suit many applications. Fun, colourful and durable, this bench is perfect for water parks, playgrounds and landscaping features. Additionally, the Annon can act as a water reservoir for irrigation by adding a gravity-fed, slow-drip hose adapter. Not only is it playful and customizable, it is also functional, saving time and money.

WISHBONE MANUFACTURING

PRECISION CRAFTSMANSHIP

At Wishbone we take pride in every product we create. Our team of skilled craftsmen manufactures, assembles and finishes every piece to exact specifications. By managing all stages of manufacturing, we can ensure the highest quality, accommodate a variety of customization and continually thrill our customers.

100% RECYCLED ALUMINUM CASTINGS

At Wishbone's Canadian foundry the cast aluminum components are made from recycled car and truck rims.

WISHBONE POWDER COATING

Our process starts where others finish. Wishbone supports “green” building practices, so we utilize an environmentally friendly powder coating that contains no VOCs and results in a finish that is safer for human health than other coatings. Chemicals used in our process can be neutralized and disposed of safely.

Super-durable polyester powders have become the mainstay of the architectural railing industry due to their outdoor performance. Our special TGIC powders meet or exceed AAMA 2605 commercial specifications with superior gloss retention and weathering resistance.

ENVIRONMENTAL STEWARDSHIP

One of the environmental problems of our time is the amount of plastic that ends up in our landfills and oceans. Wishbone sees this as an opportunity to make a difference locally while also having a global impact. The Advantage +™ boards used in Wishbone products are made from 50% post-consumer and 50% post-industrial recycled plastics. That means more durable park furniture and less plastic waste in the environment.

The next time you enjoy one of our park furnishings, know that you are part of the solution.

AVANTAGE +™ RECYCLED PLASTIC BOARDS

Beyond benefitting the environment, Advantage +™ boards are non-toxic, ultra-durable and low maintenance. Many of our furnishings with Advantage +™ have been in service for over 10 years, and they still look great and function like new. Quite simply, our recycled plastic boards are a better material for the demands of park furniture than many alternatives.

RENEW: REVOLUTIONARY MAINTENANCE

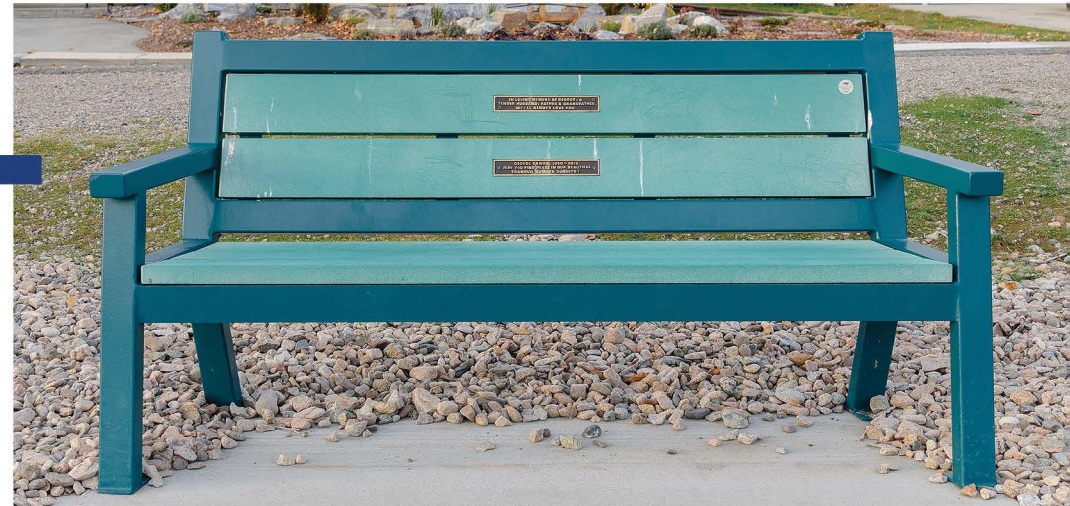

Wishbone introduces a simple maintenance process that renews the look of Wishbone recycled plastic boards in seconds. Best of all, it can be carried out in the field on fully assembled site furnishings with the Wishbone UVD Renewal Tool.

Even the effects of UV damage and weathering can be reversed with the quick and easy Renew maintenance process. It is almost miraculous how older furnishings can be made to look new again with so little effort.

CUSTOMIZATION

CUSTOMIZABLE PEDESTAL

The fluid look of City Scope benches is enhanced by the ability to easily customize the pedestal that supports the seating area. Imagine benches that exactly match architectural design elements and utilize leftover building materials to do so. Alternatively, take the opportunity to integrate unique designs directly into the bench to create a specific look or emphasize project branding.

CUSTOM DESIGNS

Wishbone continually develops new ideas and concepts in site furnishing design. In some cases these designs are initiated by our customers, based on their considerable field experience or a specific need. A great example of this is the beautiful artwork functioning as seating surfaces shown here.

Got a great idea or concept? Our team can turn it into reality.

CUSTOM MODIFICATIONS, ROUTING OR CASTING

A standard catalogue of products cannot perfectly fit every application. When a project requires variations to our existing designs, we work with clients to develop a great solution. Whether dimensions, angles or other factors need to be adjusted to satisfy specific requirements, we work to exceed the expectations of our customers and users. Logos, phrases and even intricate designs can be routed directly into the recycled plastic lumber, or cast directly into the aluminum, making them integral to the finished pieces.

PARK BENCHES

Wishbone benches are designed to enhance the experience for all users. They are easy to install and maintain, while offering a comfortable and sturdy seating surface for everyone.

We believe benches should be thoroughly enjoyed. By blending sustainable and recycled materials with unique designs, we create durable outdoor furnishings that are as functional as they are beautiful.

Sit on a Wishbone bench and you'll want to stay a little longer.

MORE BENCHES

To design great public spaces, it is important to have a variety of options in terms of form, function, materials, and colours.

Backless benches allow people to sit on either side and give designers flexibility with configurations and patterns of furnishings to complement a space.

Wishbone All Metal benches are made entirely of aluminum. They are designed to be cooler in hot environments and discourage vandalism. Many incorporate a no-weld approach that simplifies shipping and parts replacement.

At Wishbone, more is more!

TABLES

Tables create community. Whether enjoying something to eat, playing a game or just sitting down to chat, tables bring people together to enjoy some of life's special times.

Wishbone tables are designed to encourage use by being comfortable, solid and inviting. Most of our tables offer wheelchair accessibility options or avoid the need to climb over a support to sit down. Made with long-lasting recycled materials, they resist weathering and continue being attractive and functional year after year after year.

WASTE RECEPTACLES

Keeping public spaces clean while contributing to their scenic beauty is at the heart of every Wishbone waste receptacle and recycling station.

In designing our waste receptacles, we consider how they are used, how they enhance their setting and how they are maintained. Each design is the result of countless interviews, customer feedback, analysis, and testing.

Available features such as animal resistance, hidden door latches and foot pedals for hands-free operation really set Wishbone apart.

BIKE RACKS & BOLLARDS

Like all site furnishings, bike racks and bollards need to fulfill a specific purpose while complementing their surroundings.

Wishbone bike racks cleverly embrace an elegantly minimalist approach, allowing them to fit any application or space: simply install as many as required. Many of our models include a protective barrier to avoid damage to bikes or to themselves.

PLANTERS

Planters are a wonderful way to figuratively and literally add life to a setting. Whether complementing other furnishings or by themselves, Wishbone planters are designed to remain beautiful for many years to come.

Self watering planters reduce evaporation and minimize the effort needed to keep plantings watered. Customers can help the environment while also reducing maintenance costs. That's smart!

JUST BECAUSE

We love bringing great ideas to life. How to best engage people in public spaces and places is a multifaceted, ever-evolving conversation.

Many of the resultant ideas from these broad discussions provide kernels of inspiration for new product development. Exploring these concepts often requires significant investment in time and energy. Some never even make it to production.

So why do we sometimes take on such risk?

Just because!

MEMORIALS AND DEDICATIONS

COMPLETE SERVICE RESULTING IN LASTING ELEGANCE

Municipalities specify Wishbone benches for their dedication programs because we make it so simple for everyone. We offer a variety of bench styles suitable for a plaque. We also design and manufacture bronze plaques with our respected foundry partner and then securely flush-mount them on the selected furnishings for a clean, professional fit.

Donors can enjoy their beautiful Wishbone memorial benches for years, and municipalities can save time and money with the simplified maintenance requirements over the lifespan of the products.

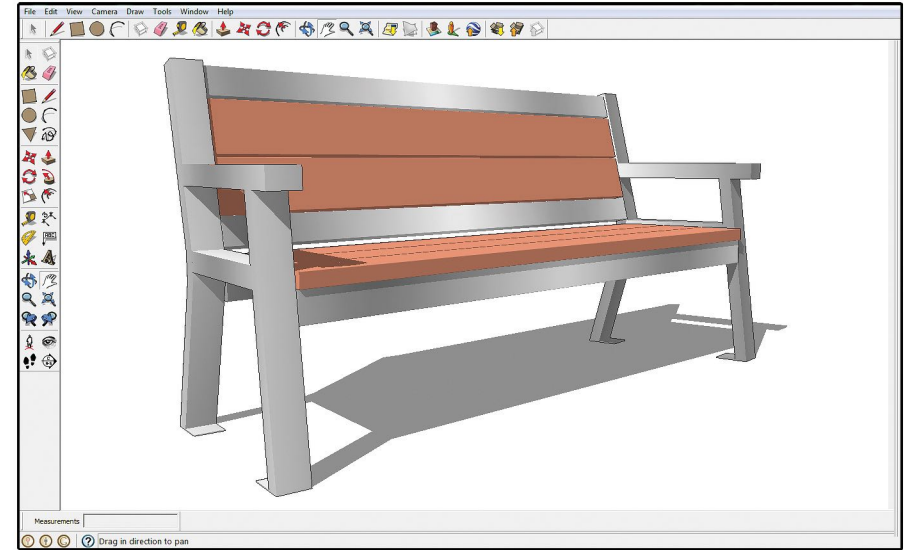

TECHNICAL INFORMATION

SIMPLIFYING PROJECT DESIGN

We understand the importance of information, particularly when planning a project. To save time during design, all of our technical drawings are intentionally available for free in a variety of formats. They can be directly dropped into a project layout.

- SketchUp
- Revit
- 3D Viewer PDF
- PDF
- DXF

SIMPLIFYING EVERYTHING ELSE

Whether just considering options for site furnishings, or preparing to install them, Wishbone provides all necessary documents and makes them easily accessible through our website.

- Product Specification Sheets
- Product Brochures
- Product Installation Guides
- Technical Bulletins
- Warranty Information
